Do you care about clean water, saving tax dollars and improved outdoor recreation?

VIRTUAL OPEN HOUSE

Master Plan for Salt Creek

at Fullersburg Woods

Come to our virtual open house to learn about the plan to improve water quality, recreation and education on Salt Creek at Fullersburg Woods, while respecting the history of the site.

The Master Plan for Salt Creek at Fullersburg Woods proposes to create over 1 mile of stream restoration and fish passage on 17 miles of Salt Creek by removing the existing dam and replacing it with a rock riffle. View recorded webinars and other resources on the Master Plan for Salt Creek at Fullersburg Woods online:

RestoreSaltCreek.org

We are also offering **two live webinars** with watershed experts and members of the DuPage River Salt Creek Workgroup who developed the master plan. The live webinars are informational only. All comments on the Master Plan will be submitted in writing via survey or mail.

Attend the live webinars:

July 7, 2020
7 PM

July 9, 2020
11 AM

Registration is required. Register here:

RestoreSaltCreek.org

Projected Benefits of the Master Plan:

- Create a better forest preserve and a healthier, more valuable waterway by improving the water quality of Salt Creek
- Save taxpayers money through cost-effective solutions that improve water quality
- Increase access to recreation and education opportunities along Salt Creek
- Preserve the historic Graue Mill and operation of the grist mill
