**THE LAWSON'S BICYCLE MUSEUM PROJECT**

1. The building of the Lawson's Bicycle Museum was done by J.P. Kulhanek and Sons.
2. Cement foundation and sidewalk was done by Collard Concrete.
3. Tempered glass was installed in the windows.
4. Jacob's Drywall did the ceiling.
5. Electrical wiring was done by Keetch Electric.
6. Lighting for the inside and outside was purchased.
7. The bead board walls were stained and put up by volunteers
8. Flooring was purchased from Thompson's Floors and installed by volunteers.
9. Heating was purchased and installed by Mauer Heating and Cooling.
10. The Lawson's Bicycle Museum sign will be purchased from Edward's Signs.
11. ADT Security was installed.

The Historical Commission pays about \$8000/yr. to maintain and operate the village. We take in most of that money through church rentals, village tours, and donations. Expansion and improvements in the village come through the Friends. It took several years to accumulate the funds needed for the Bicycle Museum. We need to rebuild the funds in the treasury. We still have plans to build a forge in the blacksmith shop, get the machine shop operational and to put up new siding on the caboose as well as paint and reroof it.

To old Friends, please renew for 2016. To those of you who aren't already members, please consider joining.
