Getting Started – Accessing the City of Edgewood GIS

Start: City of Edgewood homepage [www.cityofedgewood.org](http://www.cityofedgewood.org)

Click the “Maps” button in the center column.
Click the “Edgewood GIS Map” link or the picture of the map.
City of Edgewood

GIS Disclaimer
These maps are presented for public use as-is, with no guarantee of accuracy or completeness, using a Geographic Information System (GIS). The City of Edgewood assumes no liability for any errors, omissions, or inaccuracies in the information provided, or for any decision made, action taken, or action not taken by the user in reliance upon any maps or information provided. These maps are for information purposes only and may not represent actual conditions.

Property boundaries are for reference only and may not accurately align with aerial imagery. The precise location of property boundaries on the ground must be determined by a licensed land surveyor.

If you don’t want to see the disclaimer again, click the check box.
Welcome to the GIS!
Getting Started – Navigating the GIS

Click and drag to move the map

Scroll or click the + and – to zoom

Search for an Address or Tax Parcel using the search bar
Banner links are to outside pages.

The main layer list lets you control what information is displayed on the map.

By default, the Zoning, Tax Parcels, Waterbodies, and Roads layers are checked/turned on.

The layers are overlaid from the bottom up. At this zoom level, the Current Zoning layer is on top.

To return to the default set of layers, simply refresh the page.
Getting Started – Menu Buttons

These buttons open different menus. The main Layers list is open by default.

The basemap list lets you change the map background (e.g. streets, topographic, aerial)

Main layer list

Flood Hazard layer list

Critical Areas layer list

The map legend explains the symbology of any layer that is turned on.

The print button provides options to print the current map view
When you click on a property, the tax parcel will be selected. A pop-up will give some basic information, as well as links to additional information.

As you zoom in, the “Tax Parcels” layer will draw on the map. This layer shows approximate property boundaries.
Selecting an Underlying Layer

Sometimes you may want to click on a layer that is “underneath” another layer.

Click the arrow to move your selection to the next lowest layer.

You can also change the layer order by opening the context menu next to the layer name.
Open the legend to identify zones. Click on a zone to identify it. The Zoning Code link will open the relevant section of the Edgewood Municipal Code.
To turn on all critical areas layers, click the “Critical Area Layers” list button on the top right.

Open the list menu, and click the “Turn all layers on” button.

Open the legend to identify the layers.
