**RE: 2018 – North Infrastructure Project**

## **CONSTRUCTION ACTIVITY NOTICE (Project Progress)**

### **Activity Type: Project Updates – Email Address Request**

Dear Resident,

The Village has approved the construction plans and specifications for the **2018 – North Infrastructure Project**. Although the scope of work will vary from street to street, this project consists of various improvements which may include; asphalt resurfacing or pavement reconstruction, pavement patching, and utility improvements (water main, sanitary sewer and storm sewer).

Roadways consisting of pavement resurfacing will have pavement patching and spot curb and gutter replacement based on field conditions. The pavement reconstruction areas will be composed of 5" asphalt pavement over 12" of base course. In addition, there will be watermain replacement, new storm sewers, sanitary sewer replacement, sanitary sewer lining, sidewalk replacement, driveway removal and replacement, curb replacement, and pavement markings. The combined total length of improvements is 5.38 miles.\*

In an effort to deliver prompt project updates, the Village is requesting email addresses from all residents within the project limits. These addresses will assist in forwarding important information to specific areas related to water main shutdowns, street closings, and property access. The Village will provide a specific email address where residents can forward any questions or concerns related to the construction activities. For residents that do not provide an email address, notices of major activities will be provided via regular mail. Weekly updates will be posted on the Village website. Construction is scheduled to begin by late April.

Please forward your **name, street address, phone number, and email** information to [adiaz@villageofhinsdale.org](mailto:adiaz@villageofhinsdale.org) or call the Engineering Department at 630-789-7029, with any questions or concerns. Thank you for your cooperation.
