   Discussion only.
   Councilmember Wells discussed that this area does not have a four way stop sign at this location and the complaints that he gets from the citizens regarding speeding and the accidents that occur in that area. He thinks that a stop sign would reduce the speed of cars.
   Councilmember Mailman gave his reasons why a stop sign needs to be installed as well because of the amount of accidents at that location and cause individuals to slow down as approaching the school zone area.
   City Manager Miller Thornton spoke that there needs to be a justification for the installation of the stop sign because there are several areas where residents are asking for stop signs to be installed as well. She mentioned that there is a federal traffic manual that lays out the criteria for having a stop sign installed such as traffic count and number of accidents over a certain period of time.
   Councilmember Wells asked what the timeline is to do a study of this area. City Manager Miller Thornton stated that we can just start the process, but we need to make it clear that there is a process.
   Councilmember Mailman wants a timeframe such as tomorrow to advise how long this study will take. City Manager Miller Thornton stated that she and Jim, Public Works Director, will get together tomorrow to discuss.
