Notice of Request for Qualifications
Environmental Consultant Services
Upshur County, West Virginia

Introduction

Notice is hereby given that the Upshur County Commission will retain an environmental or engineering firm to provide professional and technical services necessary to undertake remediation planning activities. The activities include producing plans and specifications for bidding for remediation services necessary for the completion of the Upshur County Youth Camp Tar Pit EPA Brownfields Cleanup Project. The firm will also be retained to provide environmental management and oversight of the site cleanup activities, including serving as the Licensed Remediation Specialist (LRS) of record to navigate the site through the West Virginia Voluntary Remediation Program (VRP). Finally, the firm will also hold responsibility for regular reporting to EPA Region III, as required in the cooperative agreement. The Upshur County Youth Camp Tar Pit (the Tar Pit) is a half-acre of land situated on the western shore of the Buckhannon River in Selbyville, West Virginia that is part of the Upshur County Youth Camp Property.

Background

The Upshur County 4-H Camp site was formerly the location of the Buckhannon Chemical Company which produced charcoal, wood alcohol and calcium acetate. The Tar Pit area was used for the disposal of wastes generated by the plant, which was closed and abandoned in about 1933. USEPA estimated the approximate dimensions of the Tar Pit area at 125 ft. x 225 ft., and was thought to be 8 - 10 feet in depth. Since 1945, the property has been used as a County 4H and Youth Camp.

In 1987, a complaint was made to the West Virginia Department of Natural Resources, which led to US EPA Removal Actions in 1988. Removal actions at the site consisted of stabilization of the Tar Pit, which included placing a reinforcing cover over the tar pit area, covering it with a 6’ - 8’ veneer of soil, and installing an 8’ chain link fence around the perimeter to control access. These actions mitigated direct contact exposure and provided temporary containment. Since the 1988 removal action, vegetation has not been restricted on the cap. Thirty years of succession has resulted in a diverse array of mature plant species throughout the Tar Pit.

In October of 2017, Upshur County was awarded a U.S. EPA Brownfield Cleanup Grant for the Upshur County Youth Camp Tar Pit site in Selbyville, WV. The County received the funds to remove fencing and vegetation on and around the Tar Pit, as well as remediate the soil throughout. The goal of the cleanup is for the Tar Pit may become a safe, usable part of the camp by serving as an archery range.

Phase I ESA was performed May 10, 2016.

Upshur County Commission  
Attn: Ms. Carrie Wallace  
38 West Main Street  
Buckhannon, WV 26201

Ms. Wallace,

The Upshur County Family Resource Network and the Upshur County Tobacco Prevention Coalition has two upcoming anti-tobacco-related events coming up in February and March. The third full week of February is Through with Chew Week, and March 21, 2018 is Kick Butts Day. Both prevention events are very important to our coalition.

The UCTPC is asking the commission for space in the courthouse annex to display a table for both events. The table the coalition will use is approximately six foot long by two foot wide. The coalition would like to use the space from February 12, 2018 to March 23, 2018

By keeping the table in place for approximately four weeks, the coalition can cover both events along with our displaying the coalition’s usual tobacco prevention information. If it is not possible to have the space for approximately four to five weeks, could you advise our group which weeks are available?

We appreciate your and the commission’s time on this matter. Please feel free to contact me or the FRN’s administrative assistant and UCTPC’s secretary at (304) 473.1051 or upshurfri@yahoo.com.

Thank you,

Lori Ulderich Harvey

Standard Mileage Rates for 2018 Up from Rates for 2017

IR-2017-204, Dec. 14, 2017

WASHINGTON — The Internal Revenue Service today issued the 2018 optional standard mileage rates used to calculate the deductible costs of operating an automobile for business, charitable, medical or moving purposes.

Beginning on Jan. 1, 2018, the standard mileage rates for the use of a car (also vans, pickups or panel trucks) will be:

- 54.5 cents for every mile of business travel driven, up 1 cent from the rate for 2017.
- 18 cents per mile driven for medical or moving purposes, up 1 cent from the rate for 2017.
- 14 cents per mile driven in service of charitable organizations.

The business mileage rate and the medical and moving expense rates each increased 1 cent per mile from the rates for 2017. The charitable rate is set by statute and remains unchanged.

The standard mileage rate for business is based on an annual study of the fixed and variable costs of operating an automobile. The rate for medical and moving purposes is based on the variable costs.

Taxpayers always have the option of calculating the actual costs of using their vehicle rather than using the standard mileage rates.

A taxpayer may not use the business standard mileage rate for a vehicle after using any depreciation method under the Modified Accelerated Cost Recovery System (MACRS) or after claiming a Section 179 deduction for that vehicle. In addition, the business standard mileage rate cannot be used for more than four vehicles used simultaneously. These and other requirements are described in Rev. Proc. 2010-51.

Notice 2018-03, posted today on IRS.gov, contains the standard mileage rates, the amount a taxpayer must use in calculating reductions to basis for depreciation taken under the business standard mileage rate, and the maximum standard automobile cost that a taxpayer may use in computing the allowance under a fixed and variable rate plan.
