and federal assistance. The division continues to collaborate with others, encompassing emergency plans at home.

These disasters are continual reminders of the importance of emergency preparedness. This division has strived to be as prepared as possible for any public health emergency affecting this county. Responding to any natural or manmade disaster takes the whole community, not one agency or individual can do it alone.

The experience gained from large scale disasters such as Hurricane Sandy emphasize the importance of having individual and family preparedness plans. The division has always used National Preparedness Month to inform the public of this need and where to find resources to assist with planning. We continue to recruit volunteers for the Medical Reserve Corps (MRC) increasing those numbers from 198 to 221 volunteers in this last 12 month period. Every MRC member and health department staff are trained to have emergency plans at home.

The division continues to collaborate with others, encompassing agencies across the entire metro St. Louis region. Depending on the type and location of the disaster this collaboration builds in the possibility of immediate help followed by state and federal assistance.

**Public Health**

December 1, 2011

through November 30, 2012

Madison County Health Department

101 E. Edwardsville Road

Wood River, IL 62095-1332

www.madisonchd.org
To the Citizens of Madison County:

I am pleased to submit to you the Fiscal Year 2012 Annual Report of the Madison County Health Department. This report provides a summary of the programs and services this department provided from December 1, 2011 to November 30, 2012. The health department focuses on promoting and protecting health with a wide array of activities such as monitoring infectious diseases, inspecting restaurants, screening for breast cancer, and preparing for emergency responses.

We appreciate the collaborative efforts of all Board of Health Members, Health Advisory Members, Stakeholders, Partners and residents who assist us in the role of assuring conditions necessary for individuals to live healthy lives. Thank you for your continued support.

Sincerely,

Toni Corona, B.S., L.E.H.P.
Public Health Administrator

HEALTH PROMOTION SERVICES DIVISION

The goal of Health Promotion Services is to educate citizens about the positive effects of a healthy lifestyle and to encourage them to alter lifestyles through changes in behavior. Lifestyle changes are facilitated through the combination of efforts to enhance awareness, change behavior, and by creating environments that support favorable health practices. These lifestyle changes often require addressing physical, mental, and social issues contributing to the behavior.

Health Promotion Services administers programs with schools, community organizations, collaborations, citizens, state and regional programs, coalitions, and media. Health Promotion collaborates with many county agencies, organizations, and community members to prepare and offer education. This year the primary health promotion focus has been implementing tobacco prevention and cessation programs, continuing outreach and education with breast and cervical cancer programs, collaborating and planning to address health priorities in Madison County, and implementing sexual health education programs. For more information, please visit the Health Promotion link on our Health Department website.

The goal of the Food Sanitation Program is to protect citizens from contracting and transmitting waterborne diseases, and to educate food service operators and consumers about safe food handling practices.

Our Vision:

Healthy choices, people and places. Healthy Madison County.

We believe in:

- Being sensitive to cultural factors influencing health
- Encouraging employees to pursue personal and professional growth
- Delivering high quality services
- Identifying and minimizing health disparities
- Maintaining a qualified work force dedicated to fulfilling their roles
- Providing programs necessary to promote and protect community
- Sustaining partnerships and maintaining community collaborations
- Providing programs necessary to promote and protect community
- Sustaining partnerships and maintaining community collaborations
- Building community collaborations

The goal of the Food Sanitation Program is to protect citizens from contracting and transmitting waterborne disease, and to ensure proper well construction of private water supplies.
