PUBLIC HEALTH EMERGENCY COMMITTEE

The goal of this division is to ensure the health department as a whole monitors for and is prepared to respond decisively to terrorist attacks, now and emerging infectious diseases or disasters. This is accomplished in a collaborative effort with other Local, State, and Federal responding agencies and Private Citizens. The type of response and collaboration is determined by the type and extent of the event, each entity doing what they do best, taking the lead as their area of expertise is called upon.

This division started in July 2002 and has been progressing forward ever since. Its success over time is demonstrated in the traditional and non-traditional relationships the agency has built with partners such as law enforcement, emergency management, fire service, DOJ, SIUE, area hospitals, schools, and various agencies across the state and region since diseases. Other successes include rebuilding of the basic infrastructure of the health department: moving from paper to electronic disease reporting, adding radio communications, and needed frequencies, ensuring staff continues in new technologies, learning regional exercises in collaboration with St Louis University School of Public Health, Institute for Bio-Security (etc). These achievements are made toward building for a better prepared community to withstand the public health threats here today and those coming tomorrow. It’s not a job this department can do alone, the department sincerely thanks its partners.

Tenth Annual Report

December 1, 2003 through November 30, 2004

Madison County Health Department
101 E. Edwardsville Road
Wood River, IL 62095-1322
To the Citizens of Madison County:

I am pleased to submit to you the 2004 Annual Report of the Madison County Health Department. Activities in Environmental Health, Personal Health, Emergency Preparedness, Health Promotion and Administration were conducted in accordance with our department’s mission of providing necessary and desired programs to assure conditions in which people can be healthy.

Throughout 2004, staff of the health department remained diligent in responding to matters of public health. In addition to providing ongoing basic public health protection and disease prevention services to the citizens of Madison County, we will continue in our role of serving as a local resource who addresses the needs of the County in relation to core public health functions and essential public health services.

In the coming year, this department looks forward to enhancing collaborative efforts and partnerships with various health providers, health professionals, local and state officials, and other community stakeholders, who desire to “Enjoy Good Health” in Madison County. Thank you for your support.

Sincerely,

[Signature]
Toni Coron, B.S., L.E.H.P.
Public Health Administrator

MISSION

It is the mission of the Madison County Health Department to provide programs and activities that are necessary and desirable to assure the conditions in which people can be healthy.

The Department shall carry out its mission through regular and systematic assessments of community needs; policy development based on knowledgeable and scientific principles of health; and ensuring these actions by regulations or direct services.

ENVIRONMENTAL HEALTH SERVICES DIVISION

Food Sanitation Program

The goal of the Food Sanitation Program is to protect citizens from contracting and transmitting foodborne diseases, and to educate food service operators and consumers about safe food handling practices.

Routine Inspections .................................................. 2366
Retentions .................................................................. 323
Consultations ............................................................... 48
Temporary Food Establishment Inspections .................. 430
Summer Food Program Inspections .............................. 15
Summer Food Program Retentions ............................ 9
Complaint Investigations .............................................. 133
Foodborne Illness Investigations .................................. 15
Pest Beads ................................................................. 46

Office Visits ............................................................ 324

Vision and Hearing Screening Program

Number of Day Care/Schools Reached ...................... 83
Vision Screens Performed ....................................... 3645
Hearing Screens Performed ..................................... 1677
Total Children Referred (Counseling/Referral) ......... 101

HEALTH PROMOTION SERVICES DIVISION

The goal of Health Promotion Services is to educate citizens about the positive effects of a healthy lifestyle and to encourage them to adopt lifestyles through changes in behavior. Lifestyle changes are facilitated through the combination of efforts to enhance awareness, change behavior, and by creating environments that support positive health practices. These lifestyle changes often require addressing physical, mental, and social issues contributing to the behavior.

Health Promotion Services administers programs with schools, community organizations, collaborations, citizens, state and regional programs, coalitions, and media. Health Promotion collaborates with many county agencies, organizations, and community members to prepare and offer education. This year the primary health promotion focus is to implement a comprehensive tuberculosis prevention program, assisting in the implementation of a countywide youth alcohol initiative, continuing outreach
