Public Health Emergency Response

The goal of this division is to ensure the health department as a whole monitors for and is prepared to respond decisively to terrorist attacks, new and emerging infectious diseases or disasters. This is accomplished in a collaborative effort with other Local, State and/or Federal response agencies and Private Citizens. The type of response and collaboration is determined by the nature and extent of the event, each entity doing what they do best, taking the lead as their area of expertise is called upon.

The divisions' success over time is demonstrated in the traditional and non-traditional relationships the agency has built and maintained with partners such as law enforcement, emergency management, fire service, DOJ, DFE, area hospitals, schools and various partners across the river and region since diseases know no boundaries. Other successes include: participating in a regional Cities Readiness Initiative Pilot (CRI-Pilot) and "Gateway to Preparedness". This is the first time the health department took what it learned from past table top exercises and applied that to a full scale exercise dispensing medications to prevent disease to the population in a simulated anthrax event. These achievements are made toward building for a better prepared community to withstand the public health threats here today and those coming tomorrow. It is not a job this department can do alone. The department sincerely thanks our partners and the community.

MADISON COUNTY HEALTH DEPARTMENT

101 E. Edwardsville Road
Wood River, IL 62095-1332

11th Annual Report

December 1, 2004 through November 30, 2005
To the Citizens of Madison County:

I am pleased to submit to you the 2005 Annual Report of the Madison County Health Department. Activities in Environmental Health, Personnel Health, Emergency Preparedness, and Administration were conducted in accordance with our department’s mission of providing necessary and desired programs to assure conditions in which people can be healthy.

Throughout 2005, dedicated staff of the health department was diligent in responding to matters of public health. In addition to providing ongoing basic public health protection and disease prevention services to the citizens of Madison County, we will continue in our role of serving as a local resource who addresses the health needs of the County in relation to core public health functions and essential public health services.

We wish to express our gratitude and appreciation to the many stakeholders of public health within Madison County, and look forward to another successful year of providing quality health department programs and services.

Sincerely,

Tony Corona, B.S., L.E.H.P.
Public Health Administrator

MISSION

It is the mission of the Madison County Health Department to provide those programs and activities that are necessary and desirable to assure the conditions in which people can be healthy.

The Department shall carry out its mission through: regular and systematic assessments of community needs; policy development based on knowledgeable and scientific principles of health; and assuring these actions by regulations or direct services.

ENVIRONMENTAL HEALTH SERVICES DIVISION

FOOD SANITATION PROGRAM

The goal of the Food Sanitation Program is to protect citizens from contracting and transmitting foodborne diseases, and to educate food service operators and consumers about safe food handling practices.

- Routine Inspections ........................................... 2463
- Reinspections ................................................. 370
- Consultations .................................................. 68
- Temporary Food Establishment Inspections .............. 409
- Seemier Food Program Inspections .......................... 4
- Summer Food Program Reinspections ...................... 0
- Complaint Investigations .................................... 136

POTABLE WATER SUPPLY PROGRAM

The goal of the potable water supply program is to protect groundwater from contamination, prevent citizens from contracting or transmitting waterborne disease, and to ensure proper well construction of private water supplies.

- Well Permits Issued ....................................... 36
- Wells Inspected ............................................. 778
- Consultations ................................................ 3
- Water Wells Sealed ........................................ 18
- Non-Community Surveys ................................ 12
- Real Estate Inspections .................................... 1
- Water Well Analysis ....................................... 200

TANNING PROGRAM

The goal of the Tanning Inspection Program is to protect citizens from overexposure to ultraviolet radiation, which can cause skin irritation, eye damage, and forms of cancer.

- Initial Inspections .......................................... 5
- Renewal Inspections ....................................... 46
- Reinspections ............................................... 10
- Complaint Investigations ................................ 1

VECTOR PROGRAM

The goal of the Vector Program is to conduct surveillance activities to identify, control, and reduce the population of specific insects that have the potential for becoming disease vectors.

- Site Investigations ......................................... 7
- Dead Bird Surveillance .................................... 6
- Dead Bird Calls ............................................. 105
- Mosquito Collections .................................... 24

MEDIA CONTACTS ............................................. 6
Educational In-Services ................................. 0
Participants .................................................... 0

BODY ART PROGRAM

The goal of the Body Art Program is to prevent the occurrence of injury, infection, and disease transmission as a result of improper body art or aftercare procedures.

- Initial Assessments ....................................... 0
- Routine Inspections ..................................... 13
- Establishment Permits Issued ......................... 7
- Operator Permits Issued ................................ 12

PERSONAL HEALTH SERVICES DIVISION

The primary goal of Personal Health Services is health promotion and disease prevention. This is accomplished by programs that utilize primary and secondary prevention efforts. These programs either prevent disease or minimize the impact of disease/environmental insults on a person, family, community or at risk groups.

Communicable Disease Program:

- AIDS .................................................. 12
- Chlamydia .............................................. 778
- Enteric E Coli Infections ............................... 6
- Gonorrhea ............................................. 274
- Hepatitis A ............................................. 1
- Hepatitis B ............................................. 3
- Hepatitis C ............................................. 40
- HIV ..................................................... 17
- Neisseria Meningitis-Nesseria, Other Invasive .... 2
- Pertussis ............................................... 25
- Syphilis ............................................... 12
- STD Home Visits .................................... 89
- Total Number of Confirmed Reportable Diseases .... 1663

Immunization Program:

- Clinics Offered .......................................... 153
- Clients Seen ............................................ 6487
- Total Immunizations (Including Ig) ................. 8745

HIV Program (Counseling, Testing, Referral, Partner Notification Services):

- Clients Serviced ....................................... 325
- Tested Anonymously ................................. 81
- Tested Confidentially ................................ 20

Lead Testing and Case Management Program:

- Blood Lead Tests Reported to Health Department .... 2093
- Home Visits ........................................... 8
- Risk Assessments ...................................... 404

Blood Lead Screens ...................................... 264
Children Case Managed ................................ 36

Tuberculosis Control Program:

- TB clinics offered ..................................... 170
- Client Encounters ..................................... 2317
- Mantoux Skin Tests ................................... 197
- New Cases of MTB ..................................... 7
- Patients started on Meds ............................... 37
- Home Visits for OTT ................................ 452
- Lab Tests ............................................... 147
- Chest X-rays ............................................ 98

Genetics Follow-up and Education:

- Home Visits ............................................. 79
- Newborn Screening Follow-up ....................... 35

Perinatal Hepatitis B Program

- Case Managed .......................................... 3
- Individuals Impacted .................................... 6

Illinois Breast and Cervical Cancer Program

- Case Managed .......................................... 348
- mammograms ......................................... 912
- Pap Tests ............................................... 627
- Office Visits ........................................... 467

Vision and Hearing Screening Program

- Number of Day Care/Schools Reached .............. 73
- Vision Screens Performed ........................... 5164
- Hearing Screens Performed ......................... 3269
- Total Children Referred (Confirmative Testing) ... 67

HEALTH PROMOTION SERVICES DIVISION

The goal of the Health Promotion Services is to educate citizens about the positive effects of a healthy lifestyle and to encourage them to alter lifestyles through changes in behavior. Lifestyle changes are facilitated through the combination of efforts to enhance awareness, change behavior, and by creating environments that support good health practices. These lifestyle changes often require addressing physical, mental, and social issues contributing to the behavior.

Health Promotion Services administers programs with schools, community organizations, collaborative citizens, state and regional programs, coalitions, and media. Health Promotion collaborates with many county agencies, organizations, and community members to prepare and offer education. This year the primary health promotion focus has been implementing a comprehensive tobacco prevention program, implementing youth alcohol prevention initiative, continuing outreach and education
