Thirteenth Annual Report
December 1, 2006 through November 30, 2007
To the Citizens of Madison County:

I am pleased to submit to you the 2007 Annual Report of the Madison County Health Department. We will note growth in program activities and services provided by our dedicated staff. Collaborations and partnerships associated with the Madison County health priorities of Cardiovascular Health, Sexual Risk Behaviors, Addictive Behaviors, Cancer and Unintentional/Motor-Vehicle Injury remained active and productive this past year.

This department is committed to providing ongoing basic public health protection and disease prevention services to the citizens of Madison County, based on the core functions of assessment, policy development and assurance that are carried out in ten essential public health services.

With gratitude and appreciation to the many stakeholders of public health within Madison County - we look forward to another successful year of providing quality health department programs and services.

Sincerely,

Toni M. Corone

Toni M. Corone, B.S., L.E.H.P.
Public Health Administrator

MISSION STATEMENT

"It is the mission of the Madison County Health Department to maximize community health through education, prevention, and preventative services."

ENVIRONMENTAL HEALTH SERVICES DIVISION

FOOD SANITATION PROGRAM

The goal of the Food Sanitation Program is to protect citizens from contracting and transmitting foodborne diseases, and to educate food service operators and consumers about safe food handling practices.

BODY ART PROGRAM

The goal of the Body Art Program is to prevent the occurrence of injury, infection, and disease transmission as a result of improper Body Art or aftercare procedures.

PERSONAL HEALTH SERVICES DIVISION

The primary goal of Personal Health Services is health promotion and disease prevention. This is accomplished by programs that utilize primary and secondary prevention efforts. These programs either prevent disease or minimize the impact of disease/environmental insults on a person, family, community or at risk groups.

Communicable Disease Program:

AIDS ................................................... 2
Chlamydia ........................................... 819
Enteric E coli Infections ....................... 3
Gonorrhea .......................................... 204
Hepatitis A ......................................... 6
Hepatitis B ......................................... 3
Hepatitis C ......................................... 158
HIV ..................................................... 17
Neisseria Meningitis-Neissanni, Other Invasive ....................................... 0
Pertussis ............................................. 5
Pertussis ............................................. 5
STD Home Visits ..................................... 63
Total Number of Confirmed Reportable Diseases ....................................... 1775

Immunization Program:

Clinics Offered ....................................... 273
Clients Served ....................................... 64,486
Total Immunizations (Including IG) ................................................... 89,985

HIV Program (Counseling, Testing, Referral, Partner Notification Services):

Clinics Offered ....................................... 273
Clients Served ....................................... 64,486
Total Immunizations (Including IG) ................................................... 89,985

VICTOR PROGRAM

The goal of the Vector Program is to conduct surveillance activities to identify, control and reduce the population of specific insects that have the potential for becoming disease vectors.

Site Investigations .................................... 0
Dead Bird Surveillance .............................. 3
Dead Bird Calls ...................................... 54
Mosquito Collections ............................... 17
Media Contacts ...................................... 31
Educational In-Service Training .................. 41

TUBERCULOSIS CONTROL PROGRAM:

TB Clinics Offered .................................... 267
Client Encounters .................................... 2,451
Mantoux Skin Tests ................................... 1,229
New Cases of MTB .................................... 3
Patients started on Meds ............................ 12
Home Visits for DOT ................................. 156
Lab Tests ............................................... 41
Chest X-rays ......................................... 1,000

GENETICS FOLLOW-UP AND EDUCATION:

Home Visits ......................................... 61
Newborn Screening Follow-up .................... 11

PERINATAL HEPATITIS B PROGRAM

Case Managed ........................................... 1

Pap Screenings ........................................ 531
Office Visits .......................................... 589

VISION AND HEARING SCREENING PROGRAM

Number of Day Care/Schools Reached ............ 72
Vision Screenings Performed ....................... 3,251
Hearing Screenings Performed .................... 3,251
Total Children Referred ......................... 8,275
(Congenital Testing) ............................... 51

HEALTH PROMOTION SERVICES DIVISION

The goal of Health Promotion Services is to educate citizens about the positive effects of a healthy lifestyle and to encourage them to alter lifestyles through changes in behavior. Lifestyle changes are facilitated through the combination of efforts to enhance awareness, change behavior, and by creating environments that support favorable health practices. These lifestyle changes often require addressing physical, mental, and social issues contributing to the behavior.

Health Promotion Services administers programs with schools, community organizations, collaborations, citizen and state/provincial programs, coalitions, and media. Health Promotion collaborates with many county agencies, organizations, and community members to prepare and offer educational services. This year the primary health promotion focus has been implementing a tobacco prevention and cessation program, assisting with youth alcohol prevention initiatives and substance abuse programs, continuing outreach and education with breast and cervical cancer programs, continuing collaboration for primary care programs, continuing implementation of the core for Toms program, continuing a prostate and testicular cancer awareness and screening program, implementing school-based dental sealant programs, implementing social marketing campaigns, and partnering with the Metro East Alliance for Breast Health on a ticket for the Cancer regional social marketing campaign. For more information please, visit the Health Promotion link on our Health Department website.
