Executive Summary

The strategic planning process is meant to strengthen the organization internally, and focus on range of agency-level organizational goals, strategies, objectives, and new initiatives.

Public health serves communities and individuals by providing an array of essential services through the core functions of public health: Assessment, Policy Development, and Assurance. This document serves as a foundation for both short-term and long-range planning in accordance to the 10 Essential Public Health Services.

National accreditation of local public health departments through the Public Health Accreditation Board (PHAB) is scheduled to launch sometime in 2011. PHAB accreditation requirements include an organizational strategic plan, community health assessment, and community health improvement plan. By fulfilling these requirements, Madison County Health Department (MCHD) can apply for accreditation if desired, when Illinois deems voluntary accreditation status for certified local health departments.

In mid-2009, MCHD started working on its 4th Community Health Assessment and 5-year Community Health Plan to maintain certification from the Illinois Department of Public Health (IDPH). This is known as The Illinois Project for Local Assessment of Needs (IPLAN). To fulfill the organizational capacity assessment required by IPLAN and based on MCHD staff and Board of Health (BOH) input, The National Association of County and City Health Officials (NACCHO) “Local Health Department Self-Assessment Tool – Operational Definition of a Functional Local Health Department Capacity Assessment for Accreditation Preparation” tool was used to assess the department’s strengths and weaknesses based on the essential services framework.

The Strategic Planning Committee consisted of BOH members, Health Advisory Committee (HAC) members and MCHD management staff. A Facilitator from Illinois Public Health Institute Center for Community Capacity Development led the committee through a series of meetings over a seven month period to review the agency’s vision, mission, and values; conduct a Strength, Weakness, Analysis, Threat (SWOT) analysis; and develop strategic goals and objectives. All BOH, HAC members and MCHD staff were involved via surveys to review, evaluate and provide additional comments on the strategic planning committee projects and tasks.

For continuous quality improvement, the purpose of this plan is to guide MCHD’s work, growth, goals, objectives and action plans over the next 5 years. This plan will be used to address the health priorities addressed in the Madison County Community Health Plan, 2011-2016. These priorities include: Obesity, Substance Abuse, Mental Health, Teenage Pregnancy, and Environmental/Air Quality. Implementation strategies and timelines have been developed to clearly define the MCHD role in addressing the health priorities.
Purpose and Practices of Public Health

What Public Health Does (The Purpose of Public Health)

The fundamental obligation of agencies responsible for population-based health is to:
• Prevent epidemics and the spread of disease
• Protect against environmental hazards
• Prevent injuries
• Promote and encourage healthy behaviors and mental health
• Respond to disasters and assist communities in recovery
• Assure the quality and accessibility of health services

These responsibilities describe and define the function of public health in assuring the availability of quality health services. Both distinct from and encompassing clinical services, public health’s role is to assure the conditions necessary for people to live healthy lives, through community-wide prevention and protection programs.

Core Public Health Functions

Assessment
Policy Development
Assurance

How Public Health Serves (The Practice of Public Health)

Public health serves communities and individuals within them by providing an array of essential services. Many of these services are invisible to the public. Typically, the public only becomes aware of the need for public health services when a problem develops (e.g., an epidemic occurs). The practice of public health becomes the following ten “essential services”:

---

1. Assessment
2. Policy Development
3. Assurance
4. Monitoring Health
5. Diagnose & Investigate
6. Improve and Enforce Laws
7. Develop Policies
8. Mobilize Community Partnerships
9. Link to and Provide Care
10. Ensure Competent Workforce

---

Public Health
The 10 Essential Public Health Services

1. **Monitor health status to identify community health problems:**
   This service includes accurate and periodic assessment of the community's health status including identification of health risks, attention to vital statistics and disparities and identification of assets and resources. Also included is the utilization of methods and technology, such as GIS, to interpret and communicate data and population health registries.

2. **Diagnose and investigate health problems and health hazards in the community:**
   This service includes timely identification and investigation of health threats, availability of diagnostic services, including laboratory capacity, and response plans to address major health threats.

3. **Inform, educate, and empower people about health issues:**
   This service includes initiatives using health education and communication sciences to build knowledge and shape attitudes, inform decision-making choice and develop skills and behaviors for healthy living. Also included are health education and health promotion partnerships within the community to support healthy living as well as media advocacy and social marketing.

4. **Mobilize community partnerships to identify and solve health problems:**
   This service includes constituency development and identification of system partners and stakeholders, coalition development as well as formal and informal partnerships to promote health improvement.

5. **Develop policies and plans that support individual and community health efforts:**
   This service includes policy development to protect health and guide public health practice, community and state planning and alignment of resources to assure successful planning.

6. **Enforce laws and regulations that protect and ensure safety:**
   This service includes review, evaluation and revision of legal authority, laws and regulation. Also included are education about laws and regulations, advocating of regulations needed to protect and promote health and support of compliance efforts and enforcement as needed.

7. **Link people to needed personal health services and assure the provision of health care when otherwise unavailable:**
   This service includes identifying populations with barriers to care, effective entry into a coordinated system of clinical care, on-going care management, culturally appropriate and targeted information for at risk population groups as well as transportation and other enabling services.
8. **Assure a competent public health and personal health care workforce:**
   This service includes assessment of the public health and personal health workforce, maintaining public health workforce standards including efficient processes for licensing/credentialing requirements and use of public health competencies. Also included is Quality Improvement and life-long learning, including leadership development and cultural competence.

9. **Evaluate effectiveness, accessibility, and quality of personal and population-based health services:**
   This service includes ongoing evaluation of health programs based on analysis of health status and service utilization of data to assess program effectiveness and to provide information necessary for allocation resources and re-shaping programs.

10. **Research for new insights and innovative solutions to health problems:**
    This service includes identification and monitoring of innovative solutions and cutting-edge research to advance public health. Also included are linkages between public health practice and academic/research settings and epidemiological studies, health policy analyses and health systems research.

BOH, HAC, and MCHD Staff Surveys
Surveys were sent to Board of Health (BOH), Health Advisory Committee (HAC) and MCHD Staff to solicit feedback about the revisions of the agency’s vision, mission, and value statements, and the agency’s Strengths, Weaknesses, Opportunities, Threats. Both survey tools and summaries are in appendices.

Components of Strategic Planning Process
Vision, Mission, Guiding Principles/Values Revision
NACCHO Operational Definition Self Assessment Tool
Strengths, Weaknesses, Opportunities, Threats Analysis
Review of 2011-2016 IPLAN Priorities and MCHD role in each priority
Goals and Objectives with development of measurable outcomes and targeted time frames
Vision, Mission, Values

VISION
Healthy choices, people and places. Healthy Madison County.

MISSION
To promote, protect, and assure conditions for optimal health through leadership, partnership, prevention and response.

VALUES
We believe in …
- Being sensitive to cultural factors influencing health
- Encouraging employees to pursue personal and professional growth
- Delivering high quality services
- Identifying and minimizing health disparities
- Maintaining a qualified work force dedicated to fulfilling their roles
- Providing programs necessary to promote and protect community
- Sustaining partnerships and maintaining community collaborations
Madison County Health Department Self Assessment

The NACCHO Local Health Department Self-Assessment Tool, Operational Definition of a Functional Local Health Department Capacity Assessment for Accreditation Preparation Tool allows local health departments to measure themselves against the Operational Definition of a functional local health department and subsequently identify areas of strength and areas for improvement. Focus areas and indicators in the tool are aligned with the 10 Essential Public Health Services. The services provide consistent standards regarding how local health departments fulfill their fundamental responsibility of keeping people healthy.

MCHD managers completed the self-assessment tool. The results were summarized and then shared with the Strategic Planning Committee. Next a analysis of Strengths, Weaknesses, Opportunities and Threats (SWOT analysis) was conducted with strategic planning members and MCHD staff via survey to further identify strengths and opportunities.

The agency scored well on topics involving collection of records, trainings, meetings, disease reports, surveillance, preparedness, stakeholder engagement and some communication within focus topics. In addition, the agency has conducted three community health assessments and developed three 5-year community health plans since the department formed in 1996.

The findings also suggested that the organization has a strong focus on disease reporting relationships, community assessment and health plan development, outbreak investigations, leading response during public health emergencies, engaging stakeholders, working well with media, and has competent and credible regulatory authority.

Weaknesses were noted primarily around focus areas addressing sufficient staffing and resources for agency service delivery. Health disparities need to be better addressed throughout the agency as programs and services are developed and implemented. Quality improvement and management strategies need to be implemented. It was identified that the agency has minimal capacity for the data analysis topics in the tool. Written protocols need to be updated, revised and/or created in some circumstances.

Data analysis capacity is minimal at this time. Evaluation of programs and services delivered by the agency needs to be developed and implemented. There is a definite lack of funding for addressing identified health priorities within Madison County.

Finally, the process revealed that data sharing between Divisions could be improved. Shared documentation and knowledge can improve internal services of the agency. Staff development could be enhanced with efforts to effectively communicate the agency infrastructure (i.e. improved organizational chart, comprehensive annual report booklet, staff orientation, etc.).
### Operational Definition Self Assessment Results

**KEY DESCRIPTION:**

**No capacity:** There is no capacity, planning, staff, resources, activities, or documentation to fulfill the indicator.

**Minimal capacity:** There is minimal planning and staffing capacity to fulfill the indicator but no implementation activity or documentation.

**Moderate capacity:** There is moderate planning, staffing, and other resources to fulfill the indicator but only minimal activity and/or documentation.

**Significant capacity:** There is significant planning, staffing, and other resources and a moderate amount of activity and/or documentation.

**Optimal capacity:** There is significant planning, staffing and resources and significant to optimal activity and/or documentation to fulfill the indicator.

**ESSENTIAL PUBLIC HEALTH SERVICE**

1. Monitor health status to identify community health problems
   - Data collection, processing and maintenance
     - Disease reporting relationships; make data and information flow routine
     - Conduct or contribute expertise to periodic community health assessments
     - Integrating data/data sharing with community partners
     - Data analysis

2. Diagnose and investigate health problems and health hazards in the community
   - Routine outbreak investigations
   - Alleviate health problems and adverse health events
   - Working with other governmental agencies on routine investigation and response
   - Take lead in emergencies that are public health in nature
   - Participate when other agencies are in the lead
   - Access to lab and biostats resources
   - Capacity for emergency communications and data exchange

3. Inform, educate, and empower people about health issues
   - Develop and implement media strategies
   - General data and information exchange on issues affecting population health
   - Provide health information to individuals for behavior change
   - Health promotion programs for behavior and environmental/community change

4. Mobilize community partnerships to identify and solve health problems
   - Community planning process engaging systems partners
   - Raise awareness & gain general public support for the plan and a deeper understanding of public health issues
   - Support partners to implement action
   - Reporting progress, advocating for resources to implement priorities
Develop policies and plans that support individual and community health efforts

- primary scientific resource for policy change in public health
- policy advocacy for health improvement
- local health department role in implementing community health improvement plan

Enforce laws and regulations that protect and ensure safety

- review and update public health authority
- link local health department practice to existing law and regulation in an appropriate way
- communication with and education of regulated entities on how to comply with laws
- tracking & understanding patterns of compliance with regulation
- competent and fair enforcement actions
- notify other government agencies of enforcement violations

Link people to needed personal health services and assure the provision of health care when otherwise unavailable

- community-oriented program planning
- prevention and personal healthcare system building
- individual-focused linkages to needed care

Assure a competent public health and personal health care workforce

- overall human resources function/ workforce capacity
- public health competencies of existing workforce
- developing the future workforce
- effective public health practices used by other practitioners
- adequate resources (educational & equipment) for job performance

Evaluate effectiveness, accessibility, and quality of personal and population-based health services

- local health department evaluation strategy focuses on community outcomes
- use of evidence-based methodology for evaluation
- evaluate local health department programs
- external evaluation of other’s programs

Research for new insights and innovative solutions to health problems

- participate in research activities
- disseminate research findings
- apply research results in local health department activities
SWOT Analysis Summary

In addition to the self assessment, a analysis of Strengths, Weaknesses, Opportunities and Threats (SWOT analysis) was conducted with strategic planning members and MCHD staff via survey to identify strengths and opportunities regarding the agency.

WEAKNESSES | OPTIONS FOR MINIMIZING
--- | ---
- Cultural Competence Inclusivity | Training for Staff
- Language Inclusion | • Awareness
- Staffing Demographics? | • Lessen sensitivity
- Staffing must accommodate services | • Changes in culture esp. with certain groups
- Culture of youth violence, technology etc. | • Education

Dialogue/Communication with other local government

Need for Assistant Administrator and Management Audit of Duties/Focus

Communication – External/Internal

Lack of Human Resource Expertise

Lack of opportunities for upward movement within the organization

Minor negativity among staff

Funding

Lack of access/use of social media

OPPORTUNITIES | OPTIONS FOR TAKING ADVANTAGE

Community Health Priorities 2011-2016

The 2011-2016 Madison County Community Health Plan addresses the five health priority areas that were identified through the 2010 Madison County Health Needs Assessment. Each health priority is addressed in an exclusive committee of Madison County Stakeholders who implement the Community Health Plan over the next five years. The Stakeholders are from MCHD, hospitals, schools, agencies, organizations and citizens of Madison County. The Madison County Partnership for Community Health (MCPCH) is the umbrella collaborative for each health priority committee and therefore the action arm for implementation of the community health plan. Each priority has established outcome objectives, impact objectives, contributing factors and intervention strategies to work toward improving the health of Madison County.

The 2011-2016 Madison County Health Priorities:

1. Air Quality/Environment
2. Mental Health
3. Obesity
4. Substance Use and Abuse
5. Teen Pregnancy
Strategic Issues

The Self-Assessment and SWOT results were discussed and used to identify cross-cutting strategic issues to be addressed with the strategic plan. The following strategic issues and objectives for each issue will be addressed over the next 5-year period:

1. **Resource Development: Strengthen Workforce and Financial Structure**
   - Management Audit
   - Budget review
   - Continuity of Operations Plan
   - Succession Plan
   - Workforce Development
   - Public Health Foundation

2. **Reduce Health Disparities**
   - Educate And Identify Disparate Populations
   - Identify Evidence-Based Intervention Strategies
   - Address Disparities With Targeted Programs And Services
   - Evaluate And Make Necessary Changes

3. **Improve Quality and Outcomes of Programs and Services**
   - Baseline Review
   - Determine Effective Evaluation and Quality Improvement Protocol
   - Implement Quality Improvement System
   - Evaluate Quality Improvement Tools

4. **Assure Illinois Project for Local Assessment of Needs (IPLAN) Implementation**
   - Define MCHD Role In Madison County Partnership For Community Health (MCPCH) With IPLAN Priorities
   - Strengthen MCPCH Stakeholders Within IPLAN Priority Areas
   - Provide Hard Copy Progress Reports For Priority Committee Work
   - Monitor Health Status Indicators
Resource Development-
Strengthen Workforce and Financial Structure

Appropriating adequate funding and maintaining a workforce with diverse expertise is needed to fulfill the agency’s mission as well as assuring that core public health functions are met within Madison County. Addressing this issue will better prepare the agency to fulfill the public health needs of Madison County; increase credibility with the public, funders, and partners; and promote forward thinking and diligent fiscal responsibility. The workforce complement will enable qualified individuals to assume leadership responsibility and promote professional development.

Year 2011
- Create Scope Of Work And Request For Proposal For MCHD Management Audit
- Establish Fee Reviews Schedule Based Upon Cost Based Allocation Process
- Develop MCHD Succession Plan
- Draft MCHD Continuity Of Operations' Plan (COOP)

Year 2012
- Discuss, Analyze, Allocate And Address Management Audit Findings
- Implement 501-C3 Public Health Foundation
- Workforce Development Plan

Year 2013
- Implement Changes And Determine Effectiveness Of Audit Recommendations
- Workforce Development Continuation

Year 2014
- Evaluate Effectiveness Of Management Audit With Recommended Direction
- Workforce Development Maintenance

Year 2015-2016
- Maintain Audit Findings
- Internal Quality Improvement Evaluation
Reduce Health Disparities

Health department programs and services can be targeted to specific populations for greater impact when the avoidable differences in a populations’ health status is known. Disparate populations will be identified, stakeholders educated, and programs implemented as to the issues and circumstances impeding health status of Madison County.

Year 2011
- Define Health Disparity
- Identify Health Disparities In Madison County
- Educate Community, Partners And Stakeholders Of Known Disparities

Year 2012
- Assess Disparities As Related To IPLAN Health Priorities
- Assess Service Availability For Existing Disparities

Year 2013
- Address Disparities
- Implement Programs And Services Which Address Disparities

Year 2014
- Evaluate Effectiveness
Improve Quality & Outcomes of Programs and Services

Evaluation of effectiveness, quality and accessibility of health services is an essential component for local health departments. Increased quality improvement and outcome strategies of public health services and programs lead to improved community health status. MCHD needs a process for evaluation and quality improvement (QI) of programs and services.

Year 2011
- Obtain Baseline To Identify Which Programs And Services Need QI

Year 2012
- Establish QI Committee To Review Existing QI Tools And Models
- Select QI Protocol

Year 2013
- Format And Structure For Reporting Findings And Improvements
- Share Useful Data With Stakeholders And Policy Makers

Year 2014
- Establish Quarterly Self-Evaluation Of Programs And Service To Determine How To Improve Outcomes
Assure IPLAN Implementation

Leadership within each community health priority committee is vital for successful health outcomes. Local Health Department Recertification by Illinois Department of Public Health (IDPH) assures core public health functions in addition to providing base funding for some essential services delivered by MCHD. The Madison County Partnership for Community Health (MCPCH) brings together community partners to optimize health through leadership, partnership, prevention and response.

Year 2011
- Assign MCHD Staff To Each Priority Committee (Obesity, Mental Health, Air Quality/Environment, Teenage Pregnancy, Substance Abuse and Abuse)
- Add MCPCH Information And Documents To Health Department’s Website
- Adopt 4th Round Community Health Needs Assessment And Health Plan

Year 2012
- Create Leadership Development Opportunities For IPLAN Stakeholders
- Develop And Implement Health Plan Progress Reports For Each MCPCH Priority Committee

Year 2013
- Evaluate MCHD Involvement, MCPCH Functioning, And Progress Toward Meeting IPLAN Objectives

Year 2014
- Maintain Progress and Implementation
- Pre-Assembly Of Stakeholders For 5th Round Process Of IPLAN

Year 2015-2016
- Conduct Community Health Assessment
- Adopt Health Priorities for next IPLAN
Appendix

MCHD Vision, Mission and Values Survey Questions and Responses

Survey Question 1: The MCHD Strategic Planning Committee met for the first time this month to re-visit the vision and mission and draft guiding values. The Committee is seeking your input into the process by asking for you to provide feedback on the draft statements. Your input is very important to the process as these are "agency" statements. Please review the drafts and offer your feedback to improve and finalize this work which will guide the development of the strategic plan for the Madison County Health Department.

A mission statement should clarify the organization's purpose and indicate why it is doing what it does. It should answer the question, "Ultimately, what are we here to do?" A mission statement is intended to be shared with clients, customers and the larger community to communicate purpose and function of your organization.

The Strategic Planning Committee has drafted the following mission statement: "The Madison County Health Department maximizes community health through leadership, partnership, health promotion and quality health services to protect and assure optimal health for our residents."

Please indicate if you agree with the mission statement and if you have any suggested revisions.

<table>
<thead>
<tr>
<th>Agree</th>
<th>Disagree</th>
<th>Suggestions for Improvement:</th>
</tr>
</thead>
<tbody>
<tr>
<td>78.3%</td>
<td>21.7%</td>
<td></td>
</tr>
</tbody>
</table>

Survey Question 2: A vision statement describes what the organization should look like as it successfully implements its strategies and achieves its full potential. A vision statement answers the question, where and what do we want to be. It is intended to be inspirational and a picture in the future. A vision statement articulates dreams and hopes. The vision statement is for members of the staff and Board of Health as inspiration and direction.

The Strategic Planning Committee has drafted the following Vision Statement, "Positive health impact on all health indicators, elimination of health disparities and through provision of high quality services, a positive built environment and accessible services for all, healthy responsible residents."

Please indicate if you agree with the vision statement and if you have any suggested revisions.

<table>
<thead>
<tr>
<th>Agree</th>
<th>Disagree</th>
<th>Suggestions for Improvement:</th>
</tr>
</thead>
<tbody>
<tr>
<td>69.6%</td>
<td>30.4%</td>
<td></td>
</tr>
</tbody>
</table>
Survey Question 3. Values statements represent the core priorities in the organization's culture, including what drives members' priorities and how they act and provide their services. Values are important in strategic planning as they often serve as drivers and establish framework. Values statements should articulate how the organization will conduct itself and should answer the questions: "How do we want to treat others? and How do we wanted to be treated ourselves?"

The Strategic Planning Committee began brainstorming values that should be included in value statements. The following were included in that brainstorm:

- Employ passionate, dedicated and empowered employees to fill the roles they serve at the MCHD
- Continuously seek employee and community input and engagement and foster mutual respect among each other and with our residents
- Assure accessible information, education and preventive and health services for the residents of Madison County to be empowered to reach their optimal health
- Work through partnerships and community collaboration to increase the effectiveness and reach of our work
- Provide the highest quality services and practice continuous quality improvement and evaluation of our work
- Practice consistency, fairness and timeliness in everything we do
- Seek to understand our community and changes in our community and its culture to increase our cultural competency and better serve our residents.

Choose your response:

- Agree
- Disagree

Please offer any revisions to specific statements or additional statements that should reflect our values.

<table>
<thead>
<tr>

</tbody>
</table>
MCHD SWOT Survey Questions and Responses

**Question 1.** Based on the feedback provided through the last survey, 78% of respondents agreed with the mission statement. Feedback was offered and the mission statement was revised by the Strategic Planning Committee to address the feedback. As a reminder, a mission statement should clarify the organization's purpose and why it is doing what it does. It should answer the question, "Ultimately, what are we here to do?" A mission statement is intended to be shared with clients/customers, partners, funders and the larger community to communicate purpose and function of your organization. The revised draft mission statement is, “Madison County Health Department promotes, protects, and assures optimal health through leadership, partnership, education, prevention and response.” Please indicate whether this mission is relevant and clear?

</tr>
<tr>
<td>No 6.8%</td>
<td>3</td>
</tr>
</tbody>
</table>

**Question 2.** Based on the feedback provided through the last survey, 70% of respondents agreed with the vision statement. Feedback was offered and the vision statement was revised by the Strategic Planning Committee to address the feedback. As a reminder, a vision is for internal use within an organization and is intended to state the results of fulfilling your mission, a picture of the future communicating where and what you want to be. It is intended to be inspirational and provide direction to staff and BOH members. The revised draft vision statement is, "Through leadership and commitment, Madison County Health Department is a catalyst to influence choices and actions for optimal health.” Please indicate whether this vision is relevant and clear?
